

To Whom It May Concern,I benefit from all of XM radio's satellite stations including weather and traffic. I frequently travel from Bakersfield,CA to San Diego. During this drive I weave in and out of mountains that block conventional radio signals. XM allows me to continue to recieve music and information throughout my drive. In addition, since I pay for this service, I do not think that the National Association of Broadcasters should be able to dictate what I pay to listen to.
I respectfully urge you to consider this when making a decision with regard to the NAB's petition 04-160.

Sincerely,
Daniel Emery
